

## What is ProVect DG?

ProVect DG is a new dispersible granular formulation that provides improved application and handling characteristics.

In short, DG granules are:

- Water dispersible - dissolves readily in water
- Highly free flowing - bridging and clogging are things of the past
- Virtually dust free - less drift from target area, easier on handlers and applicators
- Practically non-abrasive - no more problems caused by sand on expensive application equipment
- Spherical in shape - less prone to hanging up on the foliage

## ProVect Features and Benefits

- Cost Effective
- Easy To Apply
- Effective in Polluted Waters
- Proven Chemistry
- Broad Spectrum Larvicide
